The Global IP Network of NTT is one of the world's largest and top-ranked Tier 1 IP backbones.

Our dual-stack Tier 1 global IP backbone spans the Americas, Europe, Asia and Oceania on a single AS2914. We operate the largest transpacific network and our capacity is always growing. With our private peering, industry leading Service Level Agreements (SLAs) and the financial backing of one of the world's largest telecommunications companies*, you can be sure that your content, data and video are always moving to where they need to go; safe and fast.

Our customers get the same provisioning and support, no matter what bandwidth they use. Whether it's 1Gbps, 100Gbps or a bandwidth in between, our dedicated Sales and Engineering teams will work with you to select the most effective way to connect to our network.

Award-winning

Products and services*

Dedicated IP Access through Tier 1 Global IP Network, including 100G ports.

- Full/fractional/burstable
- IPv6 native IPv6/IPv4 dual stack

VLink and Global Virtual Link

Ideal for companies looking for cost-effective, reliable and secure "private path" connections between their domestic and/or international locations. Provisioning of multiple VLink and Global Virtual Link circuits on a single trunk port now available.

DDos Protection Services

Built on industry-leading protection platforms and supported by the Network Security Team, Global IP Network's DDos Protection Services (DPS) allow for fast and effective actions to help mitigate the impact of DDos attacks.
